Professional Summary

AI Engineer specializing in Generative AI and agentic AI systems. Built a LangGraph multi-agent travel planner with an MCP tool layer, an AI recruitment platform using Gemini embeddings and hybrid scoring, and an explainable ML application (96% accuracy) during a data science internship. Strong in Python, FastAPI, PostgreSQL, and Docker, with a focus on building LLM applications end to end.

Technical Skills

- Languages:** Python, SQL
- GenAI & Agents:** LLMs, Prompt Engineering, RAG, LangChain, LangGraph, LangSmith, Multi-Agent Systems, MCP, Google Gemini, OpenAI, Groq, ChromaDB, FAISS
- Machine Learning:** Scikit-learn, XGBoost, TensorFlow, Deep Learning, NLP, Feature Engineering, Model Evaluation, Explainable AI (SHAP)
- Backend & Deployment:** FastAPI, Flask, REST APIs, PostgreSQL, SQLAlchemy, Alembic, Pydantic, JWT/RBAC, Docker, GCP, Git, GitHub Actions, Streamlit
- Data & Analytics:** Pandas, NumPy, MySQL, EDA, Statistics, Power BI, Excel, Matplotlib, Seaborn, Plotly

Projects

AI Travel Planner — Multi-Agent Travel Planning System [GitHub](#)

- Built a multi-agent AI travel planning system that researches destinations, accommodations, activities, restaurants, and weather to generate personalized itineraries based on dates, budget, travelers, and preferences.
- Designed a LangGraph orchestration layer with Gemini and an MCP server/client exposing five specialized travel tools, integrated with real-world APIs via Tavily and SerpApi (Google Hotels, Google Maps).
- Developed a FastAPI backend with PostgreSQL, SQLAlchemy, and Alembic migrations, a Streamlit UI with ReportLab PDF export, and LangSmith observability, fully containerized with Docker Compose.

Hirely — AI-Powered Recruitment & Candidate Matching Platform [GitHub](#)

- Built an AI-powered recruitment backend for candidate-job matching, resume parsing, and candidate ranking, with a tested FastAPI service layer.
- Implemented resume parsing (Gemini, Docling), 768-dim Gemini embeddings, deterministic skill matching, and a hybrid scoring engine (50/20/30 weighting), e.g., 95% overall match with 100% skill and 84% semantic sub-scores.
- Built a modular backend with PostgreSQL, SQLAlchemy, Alembic, Pydantic, JWT auth, and RBAC for Candidate/Recruiter roles.

Experience

Data Science Intern — Digital Ipsum Pvt. Ltd. June – July 2026 *MindSense AI — Mental Health Risk Prediction Application* [GitHub](#)

- Developed a mental health risk prediction web application using Logistic Regression, achieving 96% accuracy, 95% precision, 94% recall, and 95% F1-score.
- Built an end-to-end ML workflow (data preprocessing, feature engineering, model training, and evaluation), deployed via Flask with SQLite-backed assessment history.
- Integrated SHAP feature-importance visualizations for interpretable risk classification, automated PDF report generation, and an interactive analytics dashboard.

Education

- Master's Program in Data Science, Analytics & AI (Course Certification)** 2025 – 2026
IT Vedant, Thane
- Bachelor of Commerce (B.Com.)** 2018 – 2021 | CGPI: 7.47
MSCT, Neral

Certifications

IBM Data Analysis with Python (DA0101EN) [Verify](#) | IBM Machine Learning with Python (ML0101EN) [Verify](#) | IBM Python for Data Science (PY0101EN) [Verify](#) | SQL Mastery [Verify](#)
